

Sept 30, 2018

To our brothers and sisters in the faith - we need your prayers. God moves when His people pray and our field is in need. Pray...

Discouragement, tiredness, stress, sickness, suspicions, delays, trials, persecutions – these are the markings of our region right now – signs of the Adversary at work. Pray...

Yesterday, co-workers in another province experienced a major earthquake and a tsunami in their town. The Lord protected their lives but there is much damage and even death in the town ... pray for them.

Here I've been trying to rest as much as possible over the last couple months to regain my physical and mental stamina. It is improving but I'm probably only at fifty percent right now. Pray...

Monday, Levi and I fly interior to begin construction on a house for our friends, the Yoon family. They have joined an existing church planting team and are learning language as they also help kickstart literacy for the adults of their tribe. The team has also recently started teaching the chronological evangelistic Bible lessons in a 'suburb' of the village. Recently they taught through Noah's flood and the hearers identified with those who rejected both God's warning and His provision of salvation.

Praise God with us for:

- faithful friends who have encouraged and helped us here
- His Word going forward to places of spiritual darkness
- teams entering new areas – and persevering

Please pray with us for:

- those affected by the earthquake
- strength, peace, encouragement, faith – for our hurting team.
- a busy travel / project / building season beginning
- a teams whose house building has been halted
- peace, a steady pace, and eyes on the Lord amid the chaos

Thank you for supporting us through your prayers, gifts and encouragement!

In His grip,
Duane

The prototype. The bike project for the road to Sawa is underway, but on hold as other urgent needs have risen. The suspension functions well and it drives real straight down the road :)

More building and testing to come.
